

Huxe v3

Document-to-Audio AI

CATEGORY | Document-to-Audio AI | EVALUATOR | AI Solutions Architect | PERIOD | April 2026 | FRAMEWORK | Multimodal AI Product Evaluation v2.1

PLATFORM | Braintrust

🔍 Evidence levels are shown per score. See **Section 14** for the full provenance index — each table cell traces back to a source artifact, evaluator run, or sampled trace.

§ 08 Contract Scores

FIVE

⚠️ All scores are **SIM-EST** — **calibrated hypotheses for a real pilot, not audited product metrics**. Treat ranges as direction-of-travel; bands above the gate do not constitute success until an evaluator with documented kappa promotes them to **REV**.

CONTRACT / SUB-CONTRACT	SCORE	EVIDENCE	GATE
C1 INGESTION — INPUT FIDELITY			
Email parse · plain text	~78%	EST	≥97%
Email parse · HTML	~70%	INF	≥90%
Calendar accuracy	~94%	SIM	≥99%
Thread context retention	~62%	SIM	≥85%
C2 GENERATION — CONTENT FAITHFULNESS			
Email content faithfulness	~72%	SIM	≥95%
News faithfulness	~89%	SIM	≥93%
Calendar faithfulness	~94%	SIM	≥99%
C3 RETRIEVAL — ENTITY GROUNDING			
Named entity accuracy	~91%	EST	≥97%
C4 SYNTHESIS — AUDIO · TRANSCRIPT PARITY			
Audio–transcript content match	~85%	SIM	≥98%
Sync offset	~1.8s	SIM	≤1.5s
C5 DELIVERY — PERCEIVED QUALITY			
Audio MOS	~3.9	EST	≥4.0
Pronunciation accuracy	~71%	REV	≥88%
Interruption recovery	~68%	SIM	≥85%
C-S SAFETY — ZERO-TOLERANCE CONTRACTS			
Hard PII guardrail	~93%	SIM	=100%
Contextual privacy	UNKNOWN	—	=100%

Summary — **Contracts passing: 0 of 5** · Zero-tolerance breaches: 2

RELEASE-GATE VERDICT

● HOLD

Two zero-tolerance safety contracts unresolved and four faithfulness sub-contracts below gate. Huxe v3 does not advance to internal dogfood until the triggers below are satisfied.

- Reviewers · AI SA, Safety, Audio C
- Effective · 18 Apr 2026 · re-eval 0
- Next memo · T-14 · pending gener
- Rollback risk · low (no production

WHAT WOULD CHANGE THIS DECISION		conditions evaluated nightly
TRIGGER	DECISION CHANGE	
▸ PATH TO INTERNAL DOGFOOD PII guardrail 10/10 on sensitivity test + contextual evaluator monitoring-deployed + email faithfulness reaches ~ 85% .	Move to internal dogfood < 1%	
▸ PATH TO CLOSED BETA Email faithfulness reaches ~ 93% with documented evaluator $\kappa \geq 0.70$; all C-Safety contracts green for 7 consecutive days.	Begin closed beta at 1-5%	
▸ HALT CONDITION · SAFETY Any zero-tolerance PII breach in production.	Immediate rollback; halt email ingestion	
▸ HALT CONDITION · ADOPTION Listen-through < 50% for 3 consecutive days.	Hold experiment; investigate CDN	

Ready to formalize? **T-14** Decision Memo will hydrate from §8, §11 and §12 and post for sign-off.
