| DIMENSION                         | SCORE | FLOOR | STATUS | NOTES                       |
|-----------------------------------|-------|-------|--------|-----------------------------|
| Interruption recovery naturalness | 0.68  | ≥0.85 |        | Robotic restart at 4:22     |
| Host differentiation (10 min)     | 0.72  | ≥0.80 |        | Convergence after 7 min     |
| Prosodic appropriateness          | 0.81  | ≥0.80 |        | Minor flat patches only     |
| Topic transition smoothness       | 0.74  | ≥0.80 |        | Email→calendar seam at 3:45 |
| Conversational latency feel       | 0.71  | ≥0.85 |        | Post-Q response felt canned |
| Energy arc (full session)         | 3.1   | ≥4.0  |        | Deflation after minute 6    |

Audio Judge “ Interruption at 4:22 is the key failure — hosts restart the sentence rather than continue. The 8:17 delivery drop is invisible to transcript review. These require different fix surfaces: Voice/TTS topology + CDN buffer, not prompt engineering.

• C1 — INGESTION FIDELITY

“ Ingestion Judge: Thread collapsed to last 2 of 14 messages. Critical context from messages 3–12 unavailable to the generator.

Tag: ingestion.email.thread\_collapse Chain: HC-01 → downstream C2 failure

• C2 — FAITHFULNESS

● FAILED SIM

“ Content Judge: Claim 'Alex signed the deal' not traceable to any retrieved source. Tense collapse from future to past. Root cause is C1 thread collapse, not a generation error.

Tag: grounding.tense\_collapse Causal root: HC-01 (S1 → S6)
