Email Thread Collapse

C1 · Ingestion · thread_collapse → causal root of HC-01

HIGH

OPEN

S1 ingester returns only the last 1–3 messages of multi-message email threads when total ≥ 8. Antecedents, commitments and conditions in earlier messages are unavailable downstream — surfaces as tense_collapse and unsourced_claim in C2.

Host Convergence (Audio-Native)

C5 · Output Quality · host_convergence — dual-host blurs after ~7min

HIGH

OPEN

By minute 7 of a 10-minute session, the two synthetic hosts lose distinct prosody and vocabulary, collapsing into a single voice. Score floor 0.80; observed mean 0.72. Detectable only by listen — transcript review passes.

FREQUENCY30D9.8%

FM-007

Unsafe Recommendation · Legal Advice Drift

C-SAFETY · Override active · unsafe_recommendation · zero-tolerance breach pattern

CRITICAL

Override · S

On lawyer-profile prompts, generator occasionally produces specific legal recommendations rather than informational summary. **Counts toward the 2 active safety overrides on the topbar.** No public ship until residual rate < 0.1%.

FM-018

Audio Delivery Drop · CDN buffer

C5 · Output · delivery_drop · invisible to transcript — REV-floor only

MEDIUM

Mitigating

Audio playback truncates mid-stream on a sub-fraction of sessions, typically in the 6–9 minute range. Root in CDN buffer behavior under specific UA + network combos. Mitigation rollout 30%; full at end of week.

FREQUENCY30D1.1%

TREND 14D↓ -0.6 pts

FM-022

Entity Mispronunciation · Top-200 named entities

C5 · Output · entity_mispronunciation · new failure mode (5d old)

MEDIUM

Monitoring

TTS produces unrelated phonetic clusters for low-frequency proper nouns (people, firms, products). Top offenders: **Andreessen Horowitz, Anthropic, NotebookLM**. SIM judge missed entirely — surfaced only via REV.

FREQUENCY30D3.6%

TREND 14D— flat

FM-011

Tense Collapse · Future → Past

C2 · Faithfulness · tense_collapse · downstream symptom of FM-014

MEDIUM

Mitigating

Generator converts conditional/future statements ("expected to sign", "is reviewing") into past assertions ("signed", "approved"). Caused by missing antecedent context, not by generator bias. Mitigated by fixing FM-014.

Interruption Recovery Lag

C5 · Output · interruption_recovery_lag · sentence-restart instead of continue

MEDIUM

OPEN

When user interrupts a host mid-sentence, hosts **restart** the sentence rather than continue from interrupt position. Robotic recovery; floor 0.85, observed 0.68. Detectable only in audio-native eval.

FREQUENCY30D5.4%

Calendar Attendee Drop

C1 · Ingestion · attendee_drop · attendee count + roles lost on import

LOW

RESOLVED

Calendar parser dropped non-organizer attendees and role labels, causing events to be described as "team call" rather than 1:1 / panel. **Resolved in v1.4.2** — kept here as reference for the canary set; residual 0.6%.
