resolve within cycle

MEDIUM

3

defer · reassess Q3

3 Critical items require resolution before next Release Gate. Audit cannot be marked complete with unresolved Criticals.

01 UNMEASURED CONTRACTS / SUB-CONTRACTS

4 UNMEASURED

Sub-contracts and safety evaluators with no measurement in the current evaluation cycle.

SUB-CONTRACT	CONTRACT	AGE UNMEASURED	PRIORITY	ACTION
Contextual Privacy Evaluator Evaluator not yet built. Safety sprint is not complete until this is monitoring-deployed.	C-SAFETY	8 WEEKS	Critical	Start Evaluator Build →
Attachment Ingestion ingestion.email.attachment_blind tagged as unknown blast radius. Cannot be scored.	C1	6 WEEKS	Critical	Add to Backlog →
Sender Attribution Accuracy grounding.sender_attribution unmeasured across all 186 Release Gate cases.	C2	4 WEEKS	High	Add to Backlog →
Calendar Timezone Accuracy ingestion.calendar.timezone_error occurrence count unknown.	C1	3 WEEKS	High	Add to Backlog →

02 EXPIRED KAPPA CALIBRATIONS

3 EVALUATORS

Evaluators uncalibrated beyond the 35-day recalibration window or below kappa floor.

EVALUATOR	LAST KAPPA [EVID]	DAYS SINCE	FLOOR	STATUS	ACTION
T-05 · Ingestion Fidelity Evaluator v1 Kappa is [SIM-EST] — never validated against real human labels. Priority: validate in pilot.	0.71 [SIM-EST]	41 DAYS	0.70	Expires in 6 days	Recalibrate →
T-06 · Faithfulness Evaluator C2 Faithfulness has no active evaluator. All C2 scores currently [SIM-EST].	—	Never	0.80	NOT CONFIGURED	Configure T-06 →
T-07 · Factuality Evaluator C3 Factuality has no active evaluator.	—	Never	0.75	NOT CONFIGURED	Configure T-07 →

03 COVERAGE GAPS

from T-11

2 GAPS

Test suite gaps identified in the most recent Lifecycle Coverage Audit.

GAP	TYPE	AGE OPEN	SEVERITY	STATUS	ACTION
No scanned PDF blobs in media registry ingestion.scanned_document_blindness has zero test coverage. ≥ 3 scanned-source cases required.	Modality gap	6 WEEKS	Critical	Blocks gate	Add Test Cases →
Safety cases 1% below Release Gate target 14% actual vs. 15% target. Requires 2 additional safety test cases before gate proceeds.	Distribution gap	1 WEEK	High	Soft block	Add Test Cases →

04 OVERDUE TEMPLATES						2 OVERDUE	
Governance templates past their required completion date for this evaluation cycle.							
Template	Name	Due Date	Days Overdue	Status	Action		
T-15	Experiment Pre-Registration Pronunciation lexicon experiment <i>(Rank #3 backlog) requires pre-registration before data collection.</i>	April 30	11 Days Overdue	● High · Not started	Complete T-15 →		
T-11	Lifecycle Coverage Audit (Production stage) Production stage audit <i>not applicable until product ships. Flag for next cycle.</i>	June 1	in 20 Days	● Medium · Not started	Schedule →		

05 AGING BACKLOG ITEMS							2 ITEMS	
Formula-ranked backlog items that have remained unaddressed beyond 2 sprints. Excludes safety overrides.								
Rank	Score	Fix Description	Tag [Evid]	Age Unaddressed	Status	Action		
4	1.88	Deduplication logic — story appears twice from multiple sources <i>Deprioritized twice behind S1 fixes. Reassess after email thread fix ships.</i>	retrieval.dedup_failure REV	3 Sprints	● High	Review Priority →		
7	0.56	CDN delivery fix — audio drop at ~8:17 <i>Low formula score but [REV] evidence. User-visible failure. Consider blast radius reassessment.</i>	output.audio.delivery_drop REV	2 Sprints	● Medium	Reassess →		

Quarterly Audit Notes						Q2 2026 · auto-saved 09:42
Q2 2026 audit — primary debt drivers are safety (contextual privacy evaluator not built) and missing evaluators for C2 and C3. Huxe is pre-pilot; all kappa values are [SIM-EST]. Highest priority before Release Gate: build contextual privacy evaluator and validate T-05 kappa against real human labels. Attachment ingestion debt deferred to post-launch due to low user-facing impact at current scale.						
Marking complete creates a versioned quarterly snapshot. Debt items remain open in their respective screens until resolved.
